

Macintosh OSX Wireless Packet

Step 1 - Register

1. Connect to the Union College wireless network (ssid union) and then open a web browser. You will be automatically redirected to the Union College Responsible Use Policy Web Page. Read thru the policy and then scroll down to the bottom of the page to accept the policy and continue with the registration process.

**Please read the following Policy on Responsible Use of Union College Computing and Network Resources
Dated 6-8-2006**

Scroll down to read the entire policy and then click on the Accept button to continue. By clicking on Accept, you agree to this policy

Accept

2. After clicking on **Accept**, you will be automatically redirected to the Registration Web Page. Click on the **Start** link for **Union College Network Users** to begin the registration process.

Main Registration Page

- Next, enter your e-mail username and password and then click on the **Download** button to continue.

RESULT

WELCOME

Please enter your Union College Network username and password below to begin the final registration process. If you cannot remember your username/password, click on the Change Password link to the right. Windows 95 may not register properly, please call the IT Support to get registered.

DOWNLOAD

Please enter your user name, password, and select your device type. Then click the button to download / run the Client Security Agent(CSA) on your machine.

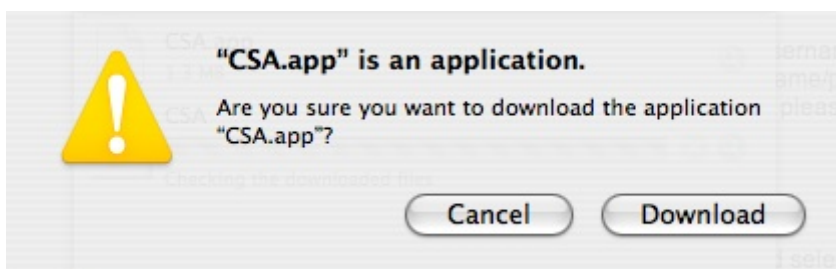

>> Instruction

User Name

Password

Download

- You will be prompted to download CSA.app. Click on **Download** to download this to your desktop.

- Next, double-click on the **CSA** icon on your desktop to run the application.

- Follow the steps on screen to complete registration. Please be patient while the CSA application scans your machine. It will scan your computer to make sure that it meets the minimum operating system and security requirements for Union's network. If any of these requirements are not met, you will be redirected to a web page explaining what did not pass and giving you instructions on how to correct this issue. If any remediation is needed, please complete the necessary items and then go thru this packet again to re-scan your machine.

7. Upon successful completion of the security scan, you will get a message that your machine meets the security requirements. At this time, **restart your computer**. After your computer is restarted, your network connection will be re-established and you will be connected to the network.
