

PREMIUM FORMULARY PREFERRED DRUG LIST

JANUARY 2018

This Formulary outlines the most commonly prescribed medications from your plan's complete pharmacy benefit coverage list, also known as a Prescription Drug List (PDL). A formulary identifies the drugs available for certain conditions and organizes them into cost levels, also known as tiers. An important part of the Formulary is giving you choices so you and your doctor can choose the best course of treatment for you.

Since the Formulary may change, we encourage you to visit your plan's member website, which should be listed on your ID card. This website is the best source for up-to-date information about all of the medications your pharmacy benefit covers, possible lowercost options and cost comparisons.

Drug Name	Drug Tier	Programs and Limits	Drug Name	Drug Tier	Programs and Limits	Drug Name	Drug Tier	Programs and Limits	Drug Name	Drug Tier	Programs and Limits

\$	Drug Tier	Includes	Helpful Tips
	Tier 1 Lowest Cost	Lower-cost, commonly used generic drugs. Some low-cost brands may be included.	Use Tier 1 drugs for the lowest out-of-pocket costs.
	Tier 1 Mid-range Cost	Many common brand-name drugs, called preferred brands.	Use Tier 2 drugs, instead of Tier 3, to help reduce your out-of-pocket costs.
	Tier 3 Highest Cost	Mostly higher-cost brand drugs, also known as non-preferred brands.	Many Tier 3 drugs have lower-cost options in Tier 1 or 2. Ask your doctor if they could work for you.

Programs and Limits	
PA	Prior Authorization – Your doctor is required to provide additional information to determine coverage.
ST	Step Therapy – Trial of lower cost medication(s) is required before a higher-cost medication is covered.
QL	Quantity Limits – Amount of medication covered per copayment or in a specific time period.
SP	Specialty Medication – Medication is designated as a specialty pharmacy drug.

Bold type = Brand-name drug
