COURSE NUMBERING SYSTEM

Courses numbered 0-49 carry no credit. Courses numbered 50-99 are designated for Common Curriculum or do not count for the major. Courses numbered 100-199 are all introductory level offerings. Courses numbered 200-299 are those at the sophomore/junior level that may also be taken by non-majors. Courses numbered 300-399 are upper-level that are primarily intended for majors, i.e., which represent the depth component of the major. Courses numbered 400-499 are all advanced level courses for seniors, including those used to fulfill the Senior Writing Experience (WS), seminars, research, thesis and independent studies.

Faculty Academic Advising.....	Monday, Feb. 5 th – Friday, Feb. 23 rd
Petition Course Sign Up.....	Saturday, Feb. 10 th – Tuesday, Feb. 13 th
Faculty Review & Approval.....	Wednesday, Feb. 14 th – Monday, Feb. 19 th
Petition Acceptance.....	Tuesday, Feb. 20 th – Thursday, Feb. 22 nd
Prescheduling Appointments.....	Monday, Feb. 26 th – Thursday, Mar. 1 st
Last Day to preschedule on WebAdvising for Spring 2018 courses.....	Sunday, Mar. 18 th

In order to preschedule for Spring term classes, students must follow these steps:

Create a conflict-free schedule including lab, lecture sections, and alternative choices in the event any of your course selections are filled.

ALL STUDENTS: your appointment time and day will be available, along with any registration holds, on WebAdvising on a screen labeled “MY REGISTRATION RESTRICTIONS.” In order to register, all holds must be satisfied and you must meet with your advisor who will remove your web registration hold.

If you have the following holds:

FI/FN/FO – Financial hold
HE – Health hold
OC – Off-Campus hold
RD- Registrar hold
RE – Registrar hold
RG – Registrar hold
SS – Sophomore Research Sem Response
WB – Web registration hold

You need to clear them with:

Ms. Cocca, Student Accounts (McKean House)
Wicker Wellness Center
Mr. Tallman, Registrar’s Office (Silliman Hall)
Mr. Tallman, Registrar’s Office (Silliman Hall)
Mr. Sacco, Registrar’s Office (Silliman Hall)
Mr. Lentz, Registrar’s Office (Silliman Hall)
Ms. Basirico, OLIN 219
Your Advisor

Petition Course Signup on WebAdvisor: **Saturday, February 10th – Tuesday, February 13th**. If a course is a “petition” course (indicated by a “Y” in the Petition column on the course listing), interested students must request a petition online.

YOU CAN PETITION FOR COURSES EVEN IF YOU HAVE A HOLD ON YOUR ACCOUNT.

To make your requests, follow the instructions on Webadvising under the “Help with Petition Course Signups” link at:

https://webadvising.union.edu/Help/Petition_signup.htm

PLEASE NOTE: For petition science courses that count towards the Common Curriculum (GenEd) **SCLB** requirement (BIO-103, 104, CHM-080,101, 102, ENS-100, GEO-112, 117, 120, IMP-121) **be sure to rate your preference among this group if you ask for more than one** by indicating if you need it for Common Curriculum (GenEd) credit (SCLB), your major or minor.

For petition courses that count towards the Common Curriculum (GenEd) **SET** requirement (BIO-065, 210, CSC-104, 106, 109, 120, ECE-101, GEO-109, MER-101, 267 and PSY-210) **be sure to rate your preference among this group if you ask for more than one** by indicating if you need it for Common Curriculum (GenEd) credit (SET), your major or minor.

If you run into any problems while signing up for petition courses, please contact the Administrative Assistant within the specific department.

Students who do not plan to return to Union for the SPRING term, should immediately NOTIFY the Dean of Students Office. Students who will be on a Union College term abroad for the Spring term **DO NOT** need to preschedule their courses.

COMMON CURRICULUM REQUIREMENTS

To find courses that satisfy different requirements in the Common Curriculum:

<http://webapps.union.edu/>

For the goals of Union's Common Curriculum and definitions of requirements:

<http://www.union.edu/offices/gen-ed/>

For the Common Curriculum Worksheet and the most current Advising Guide:

<https://www.union.edu/office/gen-ed/documents/genedadvising.17.0.pdf>

ACADEMIC POLICIES

Fourth Course Policy

For information regarding the college's policy on taking a fourth course, please go to the Academic Catalog at <http://catalog.union.edu> and click on Academic Program and Policies.

Forms are available on the Registrar's website at: <https://www.union.edu/offices/registrar/forms/>

PASS / FAIL POLICY

For information regarding the college's policy on taking a course Pass/Fail please refer to the Academic Catalog at catalog.union.edu and click on Academic Program and Policies.

Forms are **only** available at the Registrar's Office in Silliman Hall and must be completed **in person**.

CROSS-REGISTRATION POLICY

The purpose of the cross registration program is to provide students the opportunity to study areas not represented by the offerings of their home college, at no additional tuition charge. In addition to general guidelines, each college has its own set of regulations, regarding cross-registration and students should make themselves aware of these for both their home campus and the campus they are visiting.

Cross Registration has been a service of the Member Institutions of the Hudson Mohawk Association since 1970, when the Association was chartered by the New York State Board of Regents. All full time matriculated students at Union are eligible to cross register in courses during the academic year offered at the colleges listed on the next page:

Adirondack Community College
Albany College of Pharmacy
Clarkson University-Capital Region Campus
*(*Formerly Union Graduate College)*
Empire State College
Hudson Valley Community College
Maria College
Rensselaer Polytechnic Institute

Sage Colleges
Schenectady Community College
Siena College
Skidmore College
Southern Vermont College
SUNY/Albany
The College of Saint Rose

Please Note: All graduate level courses taken by Union undergraduates, including Leadership in Medicine and Combined Degree students through *Clarkson University-Capital Region Campus will require completion of a special Cross Registration Form. These forms are available in the Registrar's Office in Silliman Hall. For more information contact Al Sacco, Assistant Registrar (518) 388-6015 or saccoa@union.edu

MISCELLANEOUS NOTES

PRACTICUM COURSES – (FEES APPLICABLE)

One course credit is optionally available for participation after three terms of a practica: Choir, Dance, Ensembles, Instrumental lessons, Orchestra, Theater, and Vocal lessons. For full details regarding prerequisites, check the catalog or Departmental Offices.

MULTIPLE SECTION COURSES/LABS

Special note to all students signing up for courses which have multiple sections: Due to the possibility of over and under enrollments in certain sections of multiple section courses or lab sections, the Registrar's Office, at the request of department chairs, may switch students out of their originally scheduled courses in order to balance the sections.

CROSS-REFERENCED COURSES

Students have the option of signing up for the course under one of the two department headings. If you have a question about the course, or if it is designated as a "petition" course, please see the department that is listed under Main Course. (*ie. Crossed with ABC-123*)

DESCRIPTION OF COURSES NOT IN THE 2017-18 ACADEMIC REGISTER

Includes Revised Course Descriptions

ADA-042: Franklin Method: Dynamic Alignment. Cawley, L. The Franklin Method combines scientific and anatomical analysis with imagery intervention in ways that are both effective and fun. It is used as a tool to improve overall fitness, everyday body usage or performance enhancement in athletics, physical theatre, music and dance. This class will analyze and practice daily actions, regiment of exercise and mental training from an informed and empowered perspective to produce more efficient and impactful movement.

AMU 235: Latin Percussion Workshop. Olsen, T. The goal of this course is to give students an in-depth understanding of Afro-Cuban and Afro-Brazilian music through studying genres--rumba, son, mambo, salsa, comparsa, samba, forró--from inside the percussion section. In addition to ensemble work, students will research and transcribe Latin music styles. The course will culminate in a public performance/presentation at the end of the term. Entry to the course by audition; previous instrumental experience desirable but not required.

ANT 233: Anthropology of Humanitarian Aid. Osborn, M. What does it mean to help others? When is it an imperative and when is it an option? What considerations arise when the subject of assistance is in another country, a member of a different religion, or another culture? This course draws upon global case studies of humanitarian intervention in order to encourage students to engage critically with the complexity of what seems like an unequivocal good: humanitarian aid. Humanitarian aid plays a significant role in today's society, from the United States' recent and very complex engagement with the Ebola outbreak to aid that is dispensed as part of disaster relief. This course explores the ethics and politics of humanitarianism in global perspective. It addresses the cultural specificity of global humanitarian aid and the ways that humanitarianism has been theorized historically. This course examines the growing debate over the philosophical, moral, political, cultural and operational practices of such interventions.

ATH-105-01/EGL 292: Special Topics in Theatre - Contemporary American Theatre and Drama. Venning, D. This course is an examination of the sorts of dramatic literature and theatrical performance being created now, from successful commercial shows on Broadway and mainstays of regional theatres across the country to avant-garde works produced by new playwrights and young and up-and-coming companies in alternative venues. We will work to understand how works from diverse artists are having a direct impact in today's theatrical landscape, and, in so doing, will discuss crucial interactions between literature, theatrical performance, and American society today. Students may also examine how their own work can fit into the ever-changing literary and theatrical scene. Through class discussions, presentations and reports, in-class responses, and longer essays, students will hone their thinking and writing about drama and live performance. Students will complement their readings with attendance at live theatre in the vibrant theatrical hub of New York City. CC: HUM, WAC

ATH 105-02/AVA-098: Special Topics in Theatre --Scenic Painting. Mannion, A. An introduction to and practical application of the processes, techniques, tools, and materials used in theatrical scene painting. Students study surface preparation, color theory and mixing, the manipulation of two-dimensional space through use of form and color, faux finishes and the interpretation of design elevations in the execution of completed scene painting. Students may also participate as scenic painters for the semester's production.

ATH 240 / EGL 291: Theatre Criticism. Venning, D. This is an intensive and practical course on theatrical and dramatic criticism, both in theory and practice. Students will engage with what it means to be a critic, whether as a theorist, dramaturg, reviewer, or individual audience member. Through the reading and discussion of contemporary examples of dramatic criticism and directed studies in techniques of journalistic writing students will gain an understanding of the nature and function of artistic criticism. Through class discussions, presentations and reports, in-class responses, essays, critical reviews of play-texts and performances, and a research report on the criticism of a major professional critic of the student's choice, students will hone their thinking and writing about drama and live performance. Students will complement their readings with attendance at live theatre, both in the vibrant theatrical hub of New York City and at a production in Union College's Department of Theatre. CC: LCC, HUM, WAC

CLS 152: Ancient Magic. Miller, K. Amulets and oracles, “voodoo dolls” and curse tablets, love potions and healing salves—these are just a few of the magical tools used by inhabitants of the ancient Mediterranean. Magical procedures ranged from the simple to the complex, and were employed by a wide variety of individuals—rich and poor, powerful and subordinate—in their efforts to influence one another and the world around them. In this course, we will investigate the role of the magician in the ancient world, the forms and techniques of ancient magic, and the religious, political, and social contexts in which these ideas arose. We will consider ancient tablets, spell-books, and artifacts, as well as descriptions of magic in ancient literary sources.

CLS 202: Introduction to Archaeological Field Methods. Commito, A. Believe it or not, there is more to archaeology than raiding tombs and cracking a bullwhip. In this course students explore what archaeology is really like, from project design to the nitty-gritty particulars of fieldwork and those “ah-ha!” moments of discovery. The course is designed to introduce students to the basics of archaeological field methods through a combination of readings and hands-on experience, and to explore the history of our Union College community. What can we learn about people in the past through physical remains? What does learning about the past teach us about ourselves? What else do archaeologists do besides dig? What happens to the artifacts we discover? Who owns them, and where do they go? How are ancient objects used to shape cultural identity and global politics today? To address these and other questions, we examine archaeological research from around the world, with a special emphasis on the ancient Greek and Roman Mediterranean. Students use their new skills in interpreting material culture to analyze the physical world around them in new and surprising ways.

ECE 371: High Resolution Radar. Pappu, C. Introducing the concepts of the basic theory for design and analysis of radar systems. Radar signal processing, signal design, high resolution, and providing range-Doppler information. Prerequisite(s): ECE 241/BME 241

ECO 232: Current Issues in US Healthcare. Gao, J. The purpose of this course is to familiarize students with current issues in U.S. healthcare market and demonstrate how economists think about these issues. In this course, students will use basic economic concepts and tools (such as the law of supply/demand, elasticity, the competitive model, market failure, and public goods) to analyze issues in health care and health policies. A number of topics including the demand for health and health care, access to health care, cost and spending, health care systems and institutions, health care reform, and government interventions in health-related behaviors, such as smoking and obesity will be covered. The class will be structured around readings, discussions, and student presentations and debates. Prerequisite(s): ECO 101

ECO 238: Women, Technology and Globalization. Sener, F. We explore the effects of technology and globalization on women’s economic outcomes. Does increased trade improve the working conditions of women? How does the expansion of the global fertility industry affect the economic opportunities available to women? How do new technologies, such as the birth control pill and the IVF technology, affect the economic decisions of women? Why are women underrepresented in high-tech industries? To what extent do women find the opportunity to get involved in the knowledge creation economy? Prerequisite(s): ECO 101

ECO 356: Seminar in Health Economics. Gao, J. This course is designed to familiarize students with the research literature in this field and a theoretical and empirical “toolkit” that enable students to ask and answer questions as a health economist. We will cover a variety of topics concerning healthcare expenditures, Medicaid and Medicare, U.S. healthcare system, risky health behaviors, and healthcare reforms. At the end of this course, students will be familiar with the theory and literature in the field of health economics and equipped with the tools to perform empirical analysis in this field. Students will learn how to formulate a research question, review the literature, set up an economic model, collect data from published sources, and conduct statistical analysis. Prerequisite(s): ECO 241 and ECO 243

EGL 097: Hamlet, Huck, Harry & Hamilton. Jenkins, H. Too often our culture divides the popular from the great, the enduring, the “canon.” This idea does work as a general principle: consider the difference between the Twilight novels and Ulysses, e.g. Yet there are many great works that were and remain popular (consider Hamlet or the songs of Bob Dylan and the Beatles) and popular works that can be considered great (Hamilton or the Harry Potter series). Not to mention the shades of critical gray (not fifty!) in between. Game of Thrones? The Walking Dead? How do we decide what is “great” or even “good”? And just as crucially, who decides?

EGL 262: Global Modernisms. Mitchell, J. This course examines global fiction from the early twentieth century, a period often referred to as the “modernist” era. Modernist writers were literary and cultural pioneers, experimenting with prose and poetry in ways that challenged and unsettled readers; yet such changes have come to be seen as important innovations in literary style. In

addition to engaging with questions of form and style, writers from this period were also interested in subjects that were previously viewed as taboo, questionable, and, as such, often unspeakable. These topics included, but are not limited to, trauma, war, sexuality, insanity, and newly carved out gender and familial roles; perhaps most importantly for our class, modernist writers created spaces for themselves and their work all over the world. From writers in exile to writers living under colonial/imperial rule, the relationship between modernism and culture is inherently dialogic. We will interrogate the relationship between modernist experimentation, nation, and identity, moving from the United Kingdom and America to Europe, Africa, Asia, and the Caribbean. Throughout our term together, we will critically consider, discuss, and write about the dynamic between the content of modernist writing, its innovative style and form, and its connection to place and space. Prerequisite(s): EGL-100 or 101 or 102.

EGL 282: The Theory of Things: Objects, Emotions, Ideas. Murphy, J. Everybody wants things, needs things, likes things, loves things! Things drive economies, incite wars, save lives; things help us communicate, work, play, move, talk, not talk, and so much more. But how are ‘things’ defined? According to material culture studies, everyday objects become things when they are misused or exploited, cease to function, or no longer fulfill their original purpose. The theory of things derives from humanity’s interest in material culture and the connections that can be made between people and physical objects. This may seem simple enough, but there is so much more to consider when discussing ‘things,’ such as those things that are not physical objects—love, hate, desire, thoughts, feelings, moods, pain, concepts, ideas, and words, just to name a few. In this course, students will discuss both material and immaterial ‘things’ and in particular how ‘things’ affect people, predominantly marginalized individuals and groups. Prerequisite(s): EGL-100 or 101 or 102.

FLM 340: Suspense! Alfred Hitchcock and the Construction of the Thriller. De Seve, J. Students will learn how to structure and produce suspense films in this fun, hands-on film production course. Weekly group production exercises, readings, technical lectures and technical practice form the platform from which students will investigate, analyze and reproduce the suspense techniques of director Alfred Hitchcock. While the course concentrates on Hitchcock we will also look at other directors’ techniques to help pull Hitchcock’s into critical focus.

GRK 240 Hellenistic Greek . Bedford, P. Hellenistic, or Koiné, Greek is a later vernacular Attic Greek that developed after the conquests of Alexander the Great. It has a diverse literature attested throughout the Greco-Roman world, and includes the New Testament (see GRK 243). In this class we will read a selection of Jewish and Christian texts, including the Septuagint, as well as secular letters and inscriptions.

HST 206 Refugess in World History. Miller, O. Is there a relationship between modern nationalism, exclusion and coerced migration? Some might locate the beginning of nationalism to the late 15th century with expulsion of Jews from Spain. Others have noted that modern nations of “race” and “racism” are irrevocably tied up with the trans-Atlantic slave trade. This class will examine the history of coerced migration between the first world war and the present. The premise of this class will be to examine broadly a number of historical examples of coerced migration and how they have contributed to the making of our modern world.

HST 207 The Revolution Will Be Accessorized: Modern European History through Fashion and Costume. Ellis, A. According to the narrator of *Orlando*, a 1928 novel by English writer Virginia Woolf (1882-1941), “Vain trifles as they seem, clothes have, they say, more important offices than to merely keep us warm. They change our view of the world and the world’s view of us.” This course will explore just how astute Woolf’s unnamed chronicler is. In particular, we will look closely at the role of fashion and costume in the French Revolution, during the interwar period of the twentieth century (especially in totalitarian regimes), in reference to pregnancy and breastfeeding, and as a sign of minority religious identity in a widely (although not entirely) secular contemporary Europe.

HST 174: Making of Ireland. Cramsie, J. The social, religious and political forces that have shaped the history of Ireland from its origins to the present. Course topics include changing the Irish identities, including those of modern Irish women, the global movement of the Irish people, the struggle for independent Ireland and the Troubles, and the challenges facing Ireland following the Peace accords of the 1990’s. It examines these questions through historical, literary and artistic resources.

ISC-200: Making Meaningful Writing: An Interdisciplinary Seminar. Johnson, J. This course is an opportunity to reflect upon our life as writers, and enhance our ability to talk with others about their writing. We will study the role of writing within the academy, paying special attention to the theme of student agency, as it relates to the production of meaningful writing in college and beyond. We will think deeply about how we write and why, and we’ll spend significant time sharing our own writing and writing practices. Of course we’ll read a sample of great writing along the way.

Students in this course will propose a meaningful writing project that they will plan, draft, and revise throughout the term. The project will be submitted during Finals week, along with student plans for exploring formal publication of their work. WAC

ISC-244/PSC 244 Political Activism and Community Engagement. Dallas, M., Schmidt, S. As a Union student, you are a member of the Union academic community. You are probably also a member of more communities outside our campus as well. Do you feel that you have responsibilities to those communities, or as a citizen of your country? Are you engaged in local or national politics? Do you belong to social groups, or groups that do community service? How is your own identity shaped by your participation in the different communities that you belong to? More generally, what makes someone a member of a community? It may be a local, national, or international group; it may be one that you joined, or one you were born into; it may be civic, or political, or purely social; it could even be based in social media and never meet in person at all. What do we owe to the communities to which we belong, and what are we entitled to receive from them? In this course we'll examine these and other questions about community and citizenship through the lens of many different disciplines at Union; the humanities, the social sciences, and science and engineering. We will also go beyond the college to directly engage with community organizations, and community members, through social and political activities. We will involve ourselves in community service, and engage in political action on issues of importance to us. Through the class and the co-curricular activities we will come to understand what our communities provide to us, how they work, and how they contribute to the well-being of both individuals and society as a whole.

ISC 360 Hamilton and the American Story Humanities Super Seminar. Murphy, J., Wareh, P. This course will offer many interdisciplinary paths to understanding the relationship between Hamilton and the American story, past and present. Our close study of *Hamilton: An American Musical* will take a variety of disciplinary and interdisciplinary perspectives, drawing on faculty expertise in fields from literature to economics to music to politics to theater to history as we explore together how this Pulitzer and Tony award winning play comments on issues such as immigration, violence, social justice, gender, and narrative.

Some of the questions we will investigate together include: How does *Hamilton* fit into a long textual and literary history of questioning what it means to be an American and who has a rightful claim to tell the American story? How did Alexander Hamilton's views of federal economic policy shape a developing American nation? How do the staging choices of the musical relate to its engagement with a wide range of social and political issues? How are we to make sense of the play's many multimedia "paratexts," including Twitter feeds, YouTube fan videos, Facebook discussions, &c. & ?

Alexander Hamilton's story also has important local and Union connections: together our class will tour the Schuyler Mansion, where Hamilton married Eliza Schuyler, and we will also reflect on the significance of Eliphalet Nott's words against dueling in response to the final confrontation between Hamilton and Aaron Burr.

As the course develops, students will be responsible for developing their own questions and responding with research-based creative projects, the most appropriate form and format for which they will decide in collaboration with the instructors. Students in the course must commit to attending required field trips, including a full-day trip on Wednesday, May 2.

LAS 201: Energy and Natural Resource History of Latin America and the Caribbean. Garcia, J. The course will examine the development of natural resources in Latin America and the Caribbean from an indigenous, African diasporic and European perspective and how they intersected. Foremost this will be an analysis of the development of capitalism in the New World and its impact on European economic development through precious metals and agricultural products during the colonial period into the 18th, 19th and 20th centuries as mono-cultural products (sugar, cotton, coffee, and petroleum) were imposed. Furthermore, the course will focus on how the U.S. adopted a neo-colonial role towards the region as European nations lost their empires, and globalization created a dependency on U.S., European and Japanese economic support. The time span for this course is roughly from pre-Colombian studies of natural resources, labor and their uses in various indigenous empires and their intersection with the Spanish and Portuguese empires to contemporary struggles between national governments and multinational mining ventures. This will include the rise of slavery in the production of natural resources and labor that were instrumental in Spanish/Portuguese conflicts with the French and English empires to current corporate and national government mining consortiums displacing local people. The British dominance of the slave trade via control of the world's seas, and its connections between the U.S. and Latin America and the Caribbean through the legacy of imperialism. The regions of specific study will include those countries historically rich in natural resources including labor from the colonial period to the present. The comparative nature of the course follows the political economy and historical sociology of the changing dynamics of globalization since the 1600s to the

contemporary period focused on the strategic importance of Latin America and the Caribbean in the development of international capitalism.

Energy and Natural Resource History of LACS is a study of the conflicts surrounding the world's most sought-after resources and an important yet neglected study in Latin American and Caribbean Studies (LACS) Program at Union College. A natural resource topic in LACS but also in other disciplines that connect with economics, history, political science, and sociology. It provides a) a set of critical tools for understanding the historical sociology of natural resource relations in the region; b) a methods and skills course pertinent to examining the history, sociology and politics of natural resource policy development; and c) a set of reflexive and critical coordinates useful in understanding institutional processes responsible for the development of natural resource policies in Latin America and the Caribbean during the 20th and 21st centuries. Consult with the current LACS director or your advisor(s) prior to considering your options in order to ascertain the course's relevance and recognition within your area(s) of study.

LAS 203: China and Globalization in Latin America and the Caribbean. García, J. Through the China and globalization course students will develop an introductory understanding about the challenges and complexities of Economic and social justice struggles from a sociology of globalization approach. An emphasis will be placed on the study of marginalized (indigenous, immigrant, LGBTQ, people of color, women and refugees) communities in the Americas regarding the economic, political, military and social struggles encountered since the end of the Second World War regarding access to living space in regional and urban spaces. Students will explore current theoretical ideas and debates about the role of China in the globalization of Latin America and the Caribbean from an environmental and social justice perspective critical of current militarization, gentrification, financialization, politics, marketing and technological efforts to further displace populations using progressive neoliberal methods and strategies. The general focus will be on the transition from Cold War policies to the Drug War militarization of local communities for the accumulation of wealth and power.

The literature for the course is interdisciplinary and will cover topics related to the major challenges facing an increasingly global society that confronts global capitalism. Key concepts to be covered throughout the course include: Drug war militarization, environmental and social justice, globalization, transnational capitalism, global cities, transnational social movements, transnational migrations and refugees, race and ethnicity within the U.S./Latin American/Caribbean social structure, and gendered experiences focused on a stronger understanding of the complicated struggle for social justice in the twenty-first century Americas.

China and Globalization in Latin America and the Caribbean is a study of the struggles surrounding the changes brought about by the accumulation of wealth and its impact on societies through globalization an important yet neglected study in Latin American and Caribbean Studies (LACS) Program at Union College. A globalization topic in LACS but also in other disciplines. It provides a) set of critical tools for understanding the sociology of globalization in the region; b) a methods and skills course pertinent to examining the history, sociology and politics of global capitalism policy development; and c) a set of reflexive and critical coordinates useful in understanding institutional processes responsible for the development of socioeconomic policies in LAC during the 20th and 21st centuries. Consult with the current LACS director or your advisor(s) prior to considering your options in order to ascertain the course's relevance and recognition within your area(s) of study.

MER 267: China by Numbers. Ramasubramanian, A. This course will expose students to basic data analysis and visualization. In particular, we will analyze data sets that tell a story about modern China. We will use data from publicly available sources such as the UN and The World Bank. Examples include official and unofficial estimates of Chinese pollution levels, GDP growth, population growth, and Chinese contributions to the United Nations. The class will cover the basic programming skills necessary to analyze and visualize data; prior exposure to programming, while helpful, is not necessary. CC: SET

PSC 339: Seminar in Political Theory: Feminist Futures in the Trump Years. Marso, L.J. This course will explore realism and fantasy in feminist futures imagined under the threat and the reality of the Trump presidency. As strong forces try to turn back the clock on hard won victories for gender and racial equality, full franchisement, reproductive freedom, and freedom from violence, what can feminist imaginings show us about a renewed call for struggle? In addition to reading several recent books in feminist political theory that map the realist/fantasy tension and help us think about problems and possibilities for feminist resistance, we will also explore the ways the feminist future is imagined in recent popular visual culture.

SCH 400 / ICS 300: Millennials And Social Change The Rise Of The Everyday Changemaker. Henseler, C. Millennials are the changemakers of tomorrow. They defy traditional labels and affect change every day, whether that is by ordering sustainable foods or clothes, using a rideshare app or cutting down on their carbon footprint. The Case Foundation has found that Millennials are driving social issues close to their personal lives and reshaping them in ways that disrupt traditional labels by breaking down organizational structures and demanding transparency, leveraging technology for fundraising, and working toward more inclusive and sustainable models. Who are the changemakers of today? And what principles guide their thinking?

This class is about the rise of these everyday changemaker. It's a class about Millennials who are making a difference in this world. It's about you. What social values drive your world as a Millennial student here at Union College? What change do you wish to see in the world? In this workshop-centric class, you will get to identify a cause that is near and dear to your hearts and you will develop a shout-out campaign by writing a feature article (no prior experience needed), identifying innovative Millennials and creating an infographic meant to positively increase awareness and change attitudes.

SPN 420: Hunger and Money: Narratives of Economic Crisis in Spain Today. Collinge, D. This course will investigate the current state of the economy and politics in Spain through novels, short stories, graphic novels, films, and political theory. This combination of cultural and theoretical materials will allow us to explore the consequences of neoliberal economic practices while examining alternative political spaces. We will study notions of crisis, debt, and income inequality as they pertain to workers, politicians, banks, and the government. Students should be prepared for extensive reading (including two novels), weekly writing and a final paper, and lively disagreement, discussion and debate. Keep in mind that this course is an exploration whose path will zigzag across genres, disciplines, and time periods, with the goal of raising questions rather than answering them. Prerequisites: SPN 203 and two 300-level Spanish courses, or permission of the instructor. CC: LCC, HUL, WAC
