**KRONOS MANAGERS – NEW EMPLOYEE CHECKLIST**

**Quick Summary**

1) Confirm Manager sees the employee in their **Reconcile Timecard** list. If not contact Payroll.

2) Set **Assigned Manager (Reports To)**: Who gets Time Off request. Dept Super User only

3) Verify **Schedule** (Right pane > Schedules): Controls pay period and exceptions.

4) Adjust **Hyperfinds** (Hyperfind drop-down > Edit, then re-Assign to managers): Pre-made filters for employees. Dept Super User only

5) **Biometric Finger Enrollment**: Timeclock users only.

**Detailed Steps**

1) Confirm Manager sees the employee in their **Reconcile Timecard** list. If not contact Payroll. A manager generally see everyone in a certain Division, so please confirm the correct Division they should have.

2) Set **Assigned Manager (Reports To)** Controls who gets Time Off notification (Dept Super User only)
   a. Find the Employee in the **Reconcile Timecard** genie without an Assigned Manager
   b. Click **People** button > **Edit**
   c. Switch to the **Job Assignment** tab, **Primary Account** section, then choose the manager from the **Reports To** list

3) **Schedule** Some employees are automatically added to a schedule group and others need to be set manually
   a. Go to the Schedule drawer, by expanding the rightmost tab
   b. Find the employee. Right-click to assign a new Schedule Pattern or Add to existing Group

If a new Schedule Group is needed, follow the steps below to **Create a new Schedule Group**
   a. Create group (under Setup > Scheduler Setup > Schedule Groups) by clicking "New"
   b. Add to a Schedule Group Profile (Setup > Access Profiles > Schedule Groups) – this allows only certain dept managers to see the new group
   c. Go back to the Schedules screen and remove employees from existing group
   d. Right-click employees and add to group
   e. Right click on the Group (bold name) and do Schedule Pattern to set the schedule for the group

4) **Adjust Hyperfinds (Pre-made Filters)** (Hyperfind drop-down > Edit, then re-Assign to managers) (Dept Super User only)

Hyperfinds are most typically used by managers with access to more employees than only their direct reports. A hyperfind can be configured to quickly filter for the employees relevant to them. Some employees may come into hyperfinds automatically but it depends on how it is built so a check is needed.

After a Hyperfind is adjusted it needs to be pushed out (assigned) to managers

To add a new employee to a hyperfind:
   a. Choose the Hyperfind from the top-right dropdown
   b. If adjustments are needed, click the **Edit** button
c. Follow the steps in the screenshot below
   1. Click the condition to adjust below
   2. Type in the name of the employee to add to the hyperfind
   3. Highlight the employee in the results list
   4. Click the arrow to add them to the query
   5. Click Update and Save the result
   6. Follow the next steps to Push Changes to others if this hyperfind is used by more than one person

Push changes to a Hyperfind to existing managers OR To give a new manager access to a Hyperfind:

a. Go to Setup from the right pane then Query Manager

b. Find the Hyperfind that you just modified and delete it from the other user(s).
   For our example, we need to delete the Hyperfind called ‘.Kathy VanPatten’s Employees’ from VANPETTEN, KATHLEEN M. Click on this Hyperfind, and then click Delete

c. Click the HyperFind query that you just updated or created for yourself. Verify that the value in the Name column is your name

d. With that Hyperfind now selected, click the Assign button:
