Miscellaneous

Jim Collins Foundation

P.O. Box 7097

New York, NY 10150

www.jimcollinsfoundation.org

The mission of the Jim Collins Foundation is to provide financial assistance to transgender people for gender-confirming surgeries. The Jim Collins Foundation recognizes that not every transgender person needs or wants surgery to achieve a healthy transition. But for those who do, gender-confirming surgeries are an important step in their transition to being their true selves. However, access to gender-confirming surgery is impossible for most. Discrimination against transgender people is so prevalent that many transgender people struggle to survive, never mind save for surgery costs. Even for those who have health insurance, coverage is systematically denied. Many insurance policies contain a "Transsexual Exclusion Clause" which excludes all medical procedures related to a person's transgender status. For many transgender people, access to surgery is out of reach.

The Jim Collins Foundation raises money to fund gender-confirming surgeries for those transgender people who need surgery to live a healthy life, but have no ability to pay for it themselves. We recognize that for those people who require surgery for a

healthy gender transition, lack of access to surgery may result in hopelessness, depression, and so suicide. The Jim Collins Foundation is a community-based initiative promoting the self determination and empowerment of all transgender people.

Voice Training

Jack Pickering, PhD, CCC-SLP
College of Saint Rose
1009 Madison Avenue, Room 243
Albany, NY
518.454.5236
pickerj@strose.edu

Voice training classes; a non-surgical method that attains realistic, safe results. The Department of Communication Sciences and Disorders of the College of Saint Rose in Albany, N.Y., offers a voice modification program for individuals in the transgender community, focusing on enhancing communication for male-to-female (MtF) transsexuals. Female-to-male (FtM) transsexuals are also welcome to take part in individual sessions in our clinical facility. The program includes weekly two-hour sessions that involve both group and individual intervention. Graduate student clinicians team up with clients to work on voice and communication. Clients have the opportunity to explore their goals in a safe environment, with student clinicians acting as reflective listeners and supportive communication partners.
