

Class of 2016

First Destination Report

UNION COLLEGE
SCHENECTADY, NEW YORK

Section 1: **Methodology**

For the purposes of this report, we define the Class of 2016 as those students who completed an undergraduate degree at Union College and graduated in either December 2015 or June 2016.

The primary means by which we collected information from members of the Class of 2016 was our "First Destination" survey. We invited members of the Class of 2016 to take the survey, beginning in May 2016 and until it closed at the end of December 2016.

Additionally, in an effort to learn about the post-graduation activities of as many members of the Class of 2016 as possible, we searched for usable data beyond our survey. We found a significant amount of usable employment information about the Class of 2016 on LinkedIn and Facebook. In addition, we worked with faculty and employers to collect additional post-graduate outcomes. Combining data from all of these sources, we were able to account for the post-graduation activities of 91 percent of 2016 graduates.

The National Association of Colleges and Employers ("NACE") coined the term "knowledge rate" to be used in lieu of "survey response rate" to reflect the approach of going beyond simply relying on a survey for obtaining outcomes information. "It's important to think about not how many graduates responded to your survey, but to identify the percentage of graduates for whom you have knowledge about their first-destination career outcomes. This is an acceptable research methodology as long as the data are reliable and verifiable." NACE encourages institutions to look at other legitimate sources of finding critical outcome information, such as faculty, employers, and social media. When using these sources, Union is careful to verify each outcome.
