

WINTER TERM 2020 PRESCHEDULING INSTRUCTIONS

FOLLOW US ON FACEBOOK AND TWITTER @UNIONREGISTRAR

UP TO DATE INFORMATION: <http://webapps.union.edu/course-schedules>

COMMON CURRICULUM INFORMATION: <https://webapps.union.edu/common-curriculum-apps>

TEXTBOOK PRICES AT THE COLLEGE BOOKSTORE: <http://bookstore.union.edu>

The online **2019-20 Academic Catalog** (<http://catalog.union.edu>) contains full descriptions of courses as well as information on pre-requisites. Additional course descriptions may be found within this document.

COURSE NUMBERING SYSTEM

Courses numbered 0-49 carry no credit. Courses numbered 50-99 are designated for Common Curriculum or do not count for the major. Courses numbered 100-199 are all introductory level offerings. Courses numbered 200-299 are those at the sophomore/junior level that may also be taken by non-majors. Courses numbered 300-399 are upper-level that are primarily intended for majors, i.e., which represent the depth component of the major. Courses numbered 400-499 are all advanced level courses for seniors, including those used to fulfill the Senior Writing Experience (WS), seminars, research, thesis and independent studies.

Faculty Academic Advising.....	Mon., Oct. 14 th – Fri., Nov. 1 st
Petition Course Sign Up.....	Sat., Oct. 19 th – Tue., Oct. 22 nd
Faculty Review & Approval.....	Wed., Oct. 23 rd – Mon., Oct. 28 th
Petition Acceptance.....	Tue., Oct. 29 th – Thu., Oct. 31 st
Prescheduling Appointments.....	Mon., Nov. 4 th – Thur., Nov. 7 th
Last Day to preschedule on WebAdvisor for WINTER 2020 courses.....	Sun., Dec. 15 th

In order to preschedule for WINTER term classes, students must follow these steps:

Create a conflict-free schedule including lab, lecture sections, and alternative choices in the event any of your course selections are filled.

ALL STUDENTS: your appointment time and day will be available, along with any registration holds, on WebAdvising on a screen labeled “MY REGISTRATION RESTRICTIONS.” In order to register, all holds must be satisfied and you must meet with your advisor who will remove your web registration hold.

If you have the following holds:

FI/FN/FO – Financial hold
HE – Health hold
OC – Off-Campus hold
RD- Registrar hold
RE – Registrar hold
RG – Registrar hold
SS – Sophomore Research Sem Response
WB – Web registration hold

You need to clear them with:

Ms. Stockman, Student Accounts (McKean House)
Wicker Wellness Center
Mr. Tallman, Registrar’s Office (Silliman Hall)
Mr. Tallman, Registrar’s Office (Silliman Hall)
Mr. Sacco, Registrar’s Office (Silliman Hall)
Mr. Lentz, Registrar’s Office (Silliman Hall)
Ms. Basirico, OLIN 219
Your Advisor

Petition Course Signup on WebAdvisor: **Saturday, October 19th– Tuesday, October 22nd**. If a course is a “petition” course (indicated by a “Y” in the Petition column on the course listing), interested students must request a petition online.

[YOU CAN PETITION FOR COURSES EVEN IF YOU HAVE A HOLD ON YOUR ACCOUNT.](#)

To make your requests, follow the instructions on Webadvising under the “Help with Petition Course Signups” link at:

https://webadvising.union.edu/Help/Petition_signup.htm

PLEASE NOTE: For petition science courses that count towards the Common Curriculum (GenEd) **SCLB** requirement (BIO-060, 103, 104, CHM-101, 102, ENS-100, 215, IMP-120) **be sure to rate your preference among this group if you ask for more than one** by indicating if you need it for Common Curriculum (GenEd) credit (SCLB), your major or minor.

For petition courses that count towards the Common Curriculum **SET** requirement (BIO-206, 210 CSC-105, 106, 107, 120, ECE-101, 218, MER-101 and PSY-210) **be sure to rate your preference among this group if you ask for more than one** by indicating if you need it for Common Curriculum credit (SET), your major or minor.

If you run into any problems while signing up for petition courses, please contact the Administrative Assistant within the specific department.

Students who do not plan to return to Union for the Winter term, should immediately NOTIFY the Dean of Students Office. Students who will be on a Union College term abroad for the Winter term **DO NOT** need to preschedule their courses.

COMMON CURRICULUM REQUIREMENTS

To find courses that satisfy different requirements in the Common Curriculum:

<http://webapps.union.edu/>

For the goals of Union's Common Curriculum and definitions of requirements:

<http://www.union.edu/offices/gen-ed/>

For the Common Curriculum Worksheet and the most current Advising Guide:

<https://www.union.edu/office/gen-ed/documents/genedadvising.17.0.pdf>

ACADEMIC POLICIES

Fourth Course Policy

For information regarding the college's policy on taking a fourth course, please go to the Academic Catalog at <http://catalog.union.edu> and click on Academic Program and Policies.

Forms are available on the Registrar's website at: <https://www.union.edu/offices/registrar/forms/>

PASS / FAIL POLICY

For information regarding the college's policy on taking a course Pass/Fail please refer to the Academic Catalog at catalog.union.edu and click on Academic Program and Policies.

Forms are **only** available at the Registrar's Office in Silliman Hall and must be completed **in person**.

CROSS-REGISTRATION POLICY

The purpose of the cross registration program is to provide students the opportunity to study areas not represented by the offerings of their home college, at no additional tuition charge. In addition to general guidelines, each college has its own set of regulations, regarding cross-registration and students should make themselves aware of these for both their home campus and the campus they are visiting.

Cross Registration has been a service of the Member Institutions of the Hudson Mohawk Association since 1970, when the Association was chartered by the New York State Board of Regents. All full time matriculated students at Union are eligible to cross register in courses during the academic year offered at the colleges listed on the next page:

Adirondack Community College
Albany College of Pharmacy
Clarkson University-Capital Region Campus
Skidmore College
Empire State College
Hudson Valley Community College
Maria College

Sage Colleges
Schenectady Community College
Siena College
SUNY/Albany
The College of Saint Rose
Rensselaer Polytechnic Institute

Please Note: All graduate level courses taken by Union undergraduates, including Leadership in Medicine and Combined Degree students through *Clarkson University-Capital Region Campus will require completion of a special Cross Registration Form. These forms are available in the Registrar's Office in Silliman Hall. For more information contact Al Sacco, Assistant Registrar (518) 388-6015 or saccoa@union.edu

MISCELLANEOUS NOTES

PRACTICUM COURSES – (FEES APPLICABLE)

One course credit is optionally available for participation after three terms of a practica: Choir, Dance, Ensembles, Instrumental lessons, Orchestra, Theater, and Vocal lessons. For full details regarding prerequisites, check the catalog or Departmental Offices.

MULTIPLE SECTION COURSES/LABS

Special note to all students signing up for courses which have multiple sections: Due to the possibility of over and under enrollments in certain sections of multiple section courses or lab sections, the Registrar's Office, at the request of department chairs, may switch students out of their originally scheduled courses in order to balance the sections.

CROSS-REFERENCED COURSES

Students have the option of signing up for the course under one of the two department headings. If you have a question about the course, or if it is designated as a "petition" course, please see the department that is listed under Main Course. (*ie. Crossed with ABC-123*)

DESCRIPTION OF COURSES NOT IN THE 2019-20 ACADEMIC REGISTER

Includes Revised Course Descriptions

CLS-140 Greek Archaeology. Commito, A. For thousands of years, the Aegean has been home to dynamic societies whose complex interactions with each other and with the broader region produced some of the most distinctive cultural and political achievements of the ancient world. This course introduces students to the physical remains these societies left behind. We study key concepts of Greek archaeology, including issues of chronology and ethics, as well as major themes in the study of the ancient Greek world, such as religion and the emergence of the city-state. Special attention is paid to new developments in archaeological research methods. We begin around 3000 BCE with the rise of the region's first complex civilizations, and end around 100 BCE with the transformations brought about by Alexander the Great. Along the way, we explore how archaeological investigations reveal the distinctiveness of ancient Greece and help us reconstruct the daily lives of people in antiquity.

ECE-371: High Resolution Radar. Pappu, C. An introduction to the concepts on the basic theory for design and analysis of radar systems, radar system, range equation, signal design and signal models, signal processing, high resolution, providing range and Doppler information. **Prerequisites:** ECE 241.

ECO-134 Data Visualization. Dvorak, T. The digital world we live in generates vast amounts of data. This data has the potential to help us understand the world and make better decision. This course is about representing data using the visual domain. We learn how to turn gigabytes of numbers into pictures, movies or, most often, interactive displays. We will use the visual domain not only for communicating insights but also as means of analysis. We will learn about data structures (how to connect to data), data aggregation (how to summarize data), and principles of design (how humans consume visual content). We will apply these concepts to business and economic data, including sales, financial performance, pricing, etc. The emphasis is on hands-on exercises and creation of new visualizations using data visualization software Tableau.

ECO 212: Economic and Financial Forecasting. Karadas, E. The increasing complexity and the uncertainty of global markets is fueling the demand for professional experts who possess an understanding of forecasting, statistical tools to solve forecasting problems, and necessary computer skills to create relevant forecasts. This economic and business forecasting class combines the essential tools in economics, statistics, and mathematics to meet these growing needs. In particular, students will be taught the formal procedures of identifying and understanding characteristics of time series and financial data, and the skills for developing and analyzing models for forecasting time series data. Furthermore, we will discuss "real-world" applications for modeling and evaluating forecasts upon which decision-making would depend. Substantial emphasis will also be placed on efficient and effective use of a programming language, R. Also, assignments require the use of R. Prerequisite: ECO-101

ECO 235: Chinese Economy. Cheng, D. This course introduces students to the workings of Chinese economy. It is about the transformation of China's economy into a market economy with its special characteristics. China has the largest population in the world and plays an important role in the global economy. Since the Chinese government initiated economic reform in 1978 from a planned economy toward a market-oriented economy, China has experienced rapid institutional changes and achieved a spectacular economic growth of about 9.5 percent per year. It is therefore necessary for every student concerned with the development of the world to understand the Chinese economy. In this course, students will learn both historical-institutional and theoretical-quantitative approaches to study China's economy. Students will develop a better understanding of Chinese historical background, economic growth, economic fluctuations, and macroeconomic policies. Moreover, students will have a chance to study Chinese banking, financial markets, foreign trade and investment. Prerequisite: ECO-101

ENS-215: Exploring Environmental Data. Stahl, M. Understanding how the Earth and environment works requires the careful analysis and interpretation of scientific data. Increasingly, the limitations to our understanding lie not in the

availability of data, but rather in our ability to analyze and find meaning in it. Deriving insight from environmental data, in particular large and complex datasets, requires new tools, methods, and ways of thinking. In this class we are going to learn how to code in the programming language R and use it to analyze environmental data in order to better understand the Earth's systems. This course will feature a hands-on classroom with programming and data analysis occurring interactively during the class. Students will learn how to analyze and visualize large datasets and how to write code, while also covering interesting components of environmental and Earth sciences.

FLM-340: Suspense! Alfred Hitchcock and the Construction of the Thriller. de Seve, J. Students will learn how to structure and produce suspense films in this fun, hands-on film production course. Weekly group production exercises, readings, technical lectures and technical practice form the platform from which students will investigate, analyze and reproduce the suspense techniques of director Alfred Hitchcock. While the course concentrates on Hitchcock we will also look at other directors' techniques to help pull Hitchcock into critical focus.

FRN-405: Picturing the Beach. Bouhet, E. The beach is the end of a territory, the contour of a land where one can stare at the horizon. In western cultures in the 21st century, the beach is usually synonymous with vacation, fun and relaxation. Beaches attract masses of tourists and therefore imply a lucrative economy that many rely on. In this course, we will study and deconstruct the multiple facets of the beach imagery in the francophone world from the 19th century to the present, from Normandy to Haiti, from Belgium to Senegal, from Québec to the West Indies. The beach is not only a physical space, it is a mental space that evokes desire, a sensorial space where humans experience the spectacle of the elements. The beach is a point of contemplation. It is a point of departure for migrants, sometimes arrival. For plastic, trash or dead animals, the beach is where they end and wash up. In this course, students will analyze different representations of the beach in the collective imagination through visual works and films like *Ma Loute* (Dumont 2016), *Vers le sud* (Cantet 2005), *L'Iceberg* (Abel and Gordon 2005) among others. Texts like short stories, poems and academic articles will complement discussions. The course will culminate with a creative project. Course conducted in French. Prerequisite: 300 FRN course

HST-277/REL-277: Visions and Voodoo. Florez, J. Widespread religious change has happened in your lifetime, but much of this transformation has occurred in the global South. To better understand the nature of this shift, this course provides an introduction to the diversity of religious identities and practices that now constitute Latin America's religious geography. The growing popularity of Pentecostalism, creole possession traditions, charismatic Catholicism, and renewed interest in indigenous forms of worship are only the most conspicuous dimensions of this change. Together we will reconsider persistent stereotypes of the region as uniformly Catholic, while also examining the myriad ways in which new religious groups negotiate and challenge social, cultural, and political norms. The main goal of this course is to bring varied religious identities and practices into greater relief, while also considering the contexts in which they emerged and how they are reshaping society.

LAT-243 Ovid's *Metamorphoses*. Mueller, H. A reading of Ovid's entire *Metamorphoses* in English, the translation of sections from Latin into English, and the discussion of the work's general relation to epic as well as to cultural, linguistic, and interpretive issues raised by passages examined in detail.

MER-304: Contact, Friction and Lubrication. Lefever, J. This course will explore various topics related to tribology: the study of surfaces in contact and the ensuing phenomena of friction, wear, adhesion and lubrication. The physical and chemical origins of these phenomena as well as their engineering applications of will be discussed. Special attention will be given to lubricating oil, particularly that used in car engines. The instructor welcomes input from students with regards to the exact topics to be covered. Prerequisite: MER-213 or MER-214 or BME 311 or ECE/CHEM-224, or permission of instructor.

REL-160 Introduction to Buddhism: Visions of Awakening. Staff. This introductory course explores Buddhist understandings of the human condition and visions of human flourishing. We cover the major histories, doctrines and

practices of Buddhism, from the fifth century BCE to the present day, by engaging sacred texts from the Buddhist canon as well as poetry, literature, autobiography and film. We consider how Buddhism has changed and evolved as it spread from India, to Central and East Asia and, more recently, to the West. Key themes include the question of suffering, the nature of compassion, training the emotions, and the place of the ordinary and imperfect within Buddhist visions of enlightenment. Throughout the course, we consider the relevance of class material to our own views and experiences of the world, and to the question of how we should live our lives.

REL-185: Science, Sex and Religion. Bedford, P. This is an introductory course in which we will examine how views about the body, sexuality, and gender were influenced by religious doctrines, medical theories, and scientific practice in Western Europe from the Middle Ages to the nineteenth century. We look at such questions as: the relationship between sexuality and original sin; a woman's role in sex, reproduction, and childbirth; and the treatment of sexually transmitted diseases. We will likewise consider to what extent these historical debates and practices inform our own ideas and arguments about sex and sexuality today.

SOC-208/BIO-060: Social Identities and Science. Danowski, B. & Hill-Butler, D. Is race genetically determined? Do men and women have different brains? Is genetic ancestry testing a form of racial profiling? Should race, gender and sexuality be considered during human clinical trials? What are the pros and cons of race-based medicine? This course will focus on two related (reciprocal) questions: Do cultural understandings of race & gender influence how science is done AND do scientific results and/or the interpretations of those results change our cultural understandings of race and gender either to reinforce misconceptions or to erode them? In an interactive lecture format we will approach race and gender as biosocial constructs, exploring their roles in debates about the relationship between biology and society, nature & culture, and human similarity & difference. We will place these debates in their historical context, as we examine how cultural understandings and misunderstandings of race, gender, and difference influenced and continue to influence scientific inquiry. Next we will investigate how the sequencing of the human genome has shaped contemporary scientific questions related to genetic diversity and evolutionary lineage. Simultaneously we will deepen our understanding of cells, genetics, genomic diversity and DNA technologies during the lab portion of the course by performing some of the techniques currently used to compare individuals' genomes.
